sharp  
d are

birds. They swallow their food. All snakes are carnivores. Some birds are carnivores. Eagles and owls eat small animals. They have sharp and strong beaks and claws.

Owl beak

Eagle beak

Some eagles catch fish for food while some even feed on animals such as monkeys.

Many fish eat only other animals. Such fish have sharp teeth. Some big fish like sharks live in the sea. They are powerful hunters and kill other fish.

Shark

Many kinds of insects feed on other insects. Dragonflies feed an insect such as mosquitoes. Lady bird beetles live on plants and eat insects that damage plants. That is why lady bird beetles are known as the farmer's friend.

Frogs and toads too, eat insects. They have a long sticky tongue to catch prey insects.

Ladybird

Dragonfly

Frog
