## Introduction to Multimedia

### Let us Know

- ◆ Requirements of a Multimedia System
- ◆ Uses of Multimedia
- ◆ Installation of Multimedia CD/DVD
- ◆ How to use the Multimedia Software?
- ◆ Playing games on computer

Multimedia is a combination of two words '**multi**' and '**media**'. Multi means more than one or many and media means sources. Therefore, multimedia is a combination of text, audio, video clips, images, graphics and animations. A multimedia computer is a computer that is capable of playing sound or music and showing graphics, video, text, etc., on the screen. All new computers are multimedia computers.

Multimedia programs are interactive. They make learning very interesting and offer good entertainment options too. All the cartoon films like Tom and Jerry, Spiderman, Superman, Ice Age and Sylvester and Tweety are possible through graphic animations using a multimedia system.
