Chapter 3

The delhi sultans

*Sub- computer

Ch – 1

*Sub- Science

Ch - 04 question no 3 and 4 fill in the book

- (d) No medium is required for transfer of heat by the process of Radiation
- (e) A cold steel spoon is dipped in a cup of hot milk. It transfers heat to its other end by the process of Conduction.
- (f) Clothes of dark colours absorb heat better than clothes of light colours.

4. Match the following :

- (i) Land breeze blows during (4) (a) summer
- (ii) Sea breeze blows during (3) (b) winter
- (iii) Dark coloured clothes are preferred during (2) (c) day
- (iv) Light coloured clothes are preferred during (1) (d) night
5. Discuss why wearing more layers of clothing during winter keeps us warmer than wearing just one thick piece of clothing .
6. Look at Fig. 4.13. Mark where the heat is being transferred by conduction, by convection and by radiation.

Q. Write the steps to share information on the network?

Ans: Following are the steps to share information:

1. Open the folder that contains the documents you want to share.
2. Click on the document you want to share.
3. Click on the down arrow of share with.
4. Click on specific people.
5. Click on the down arrow button to open the menu.
6. Click on the username with whom you want to share the document.
7. Click on Add.

In solids, generally, heat is transferred by convection. No medium is required for transfer of heat by radiation.

The materials which allow heat to pass through them easily are conductors of heat.

The materials which do not allow heat to pass through them easily are called insulators.

Dark-coloured objects absorb radiation better than the light-coloured objects. That is the reason we feel more comfortable in light-coloured clothes in the summer.

Woollen clothes keep us warm during winter. It is so because wool is a poor conductor of heat and it has air trapped in between the fibres.

Exercises

1. State similarities and differences between the laboratory thermometer and the clinical thermometer.

2. Give two examples each of conductors and insulators of heat.

3. Fill in the blanks :

- (a) The hotness of an object is determined by its temperature.
- (b) Temperature of boiling water cannot be measured by a clinical thermometer.
- (c) Temperature is measured in degree celcius.
